We always back brush/back roll the first coat of paint!  
This process is recommended by siding manufacturers,  
most local paint companies and AAA Action Painting!

Why do we take time to do this important step?

- Interior and Exterior paint jobs last longer
- Paint or stain fills in splits and fractures in wood
- Finished product looks better
- Interior and Exterior paint protects and insulates better

Most painting contractors in Boise, Nampa, Meridian and the Treasure Valley do not back brush/back roll, so their bids will be less expensive. It is obvious that the extra work will cost them extra, so they do not include it on their bids.

Listen to what your paint contractors are going to do for you. If it is not on your bid, you will not be receiving this very important extra process and the quality paint job you *think* you are paying for!
